Management of Suspected & Confirmed Cases on Excursions	18

Background to the Guidelines

In mid-2020 the National Capital Educational Tourism Project (NCETP), with the support of the ACT Government, commissioned [Aspen Medical](#) to develop School Excursion COVID-19 Protocols in collaboration with the sector.

The [ACT Health Directorate](#) was consulted in the development of the Protocols in late 2020, and the NCETP developed user-friendly Guidelines to help schools travel safely to and from Canberra.

These updated Guidelines have been produced in the light of developments since 2020, following further discussions with Aspen Medical, Teachers, tour operators, national attraction staff and accommodation providers.

Purpose

The Guidelines address all components of a school excursion experience, from departure to return, including travel, accommodation, and visits to attractions.

Disclaimer of Liability

The following Guidelines have been developed to assist key stakeholders with decisions during the COVID-19 pandemic outbreak.

Every effort has been made to ensure the accuracy of content provided within these Guidelines, but key stakeholders should be aware that Protocols/Guidelines may change to reflect knowledge in the transmission of the COVID-19 virus.

The NCETP accepts no responsibility for any inaccuracies, information perceived as misleading or success or failure of any treatment regimen detailed.

Users of these Guidelines are strongly recommended where possible to confirm that information is correct by way of independent resources.

External links and information resources used in the development of these recommendations have been made available.

Important Contact Details – 7 days a week

National Coronavirus Hotline	1800 020 080 24 hours a day
National Capital Educational Tourism Project	02 6162 4460 24 hours a day

Recommendations

Excursions are an opportunity for children to experience new places and activities, however, during the COVID-19 Recovery phase, careful planning is needed to assess and minimise risk.

AHPPC advice states it is unnecessary for a group of school children to maintain 1.5 metre physical distancing during times of school activities.

An effort should be made to limit mixing between cohorts to help minimise risk, while adults should continue to maintain 1.5 metre physical distancing measures.

The number in any group allowed in an attraction is determined by the type of venue being visited and the COVID-19 safety plan the attraction has implemented at the time of the excursion.

Schools and industry bodies can take several actions to reduce the risk of COVID-19 exposure and transmission in schools and during school activities such as excursions.

Although the emergence of COVID-19 variants present as more infectious and/or easily spread viruses, ongoing use of multiple interventions can help reduce the likelihood of infection in a school group, community, and attraction visited.

The goal of following recommendations is to reduce the risk of transmission in the community and protect unimmunised students.

Recommendations include:

- encouraging all Teachers and other adults who interact with school-age children and who are eligible for the COVID-19 vaccination to be fully vaccinated
- encouraging all Teachers and other adults who interact with school-age children to protect themselves and others by wearing well-fitted face masks while in close proximity with unvaccinated children
- use of pre-excursion risk assessment and checklists
- employing a Personal Health Declaration (PHD) screening tool signed by a child's parent/guardian, to be completed in the 24-hour period before prior to a child joining an excursion
- maintaining single cohort groups
- preventing cohort groups mixing at venues
- staggering scheduled times of activities for cohort groups.

If a school excursion cohort requires transport by flight, risk mitigation measures should be adhered to as implemented by the domestic airline the cohort is travelling with.

The Domestic Passenger Journey Protocol (DPJP) is based on advice provided by Australian authorities (including endorsement by the AHPPC) and guidance from international aviation authorities such as the International Air Transport Association and the International Civil Aviation Organization.

The DPJP is intended to be used as a guide for airlines and airports to assist with developing risk-minimisation principles and processes to mitigate transmission of COVID-19, within domestic airports and on aircraft, for domestic passenger travellers and workers.¹

Due to differing regulations and requirements in different states and territories, travelling school excursion cohorts may find the implementation of recommended the DPJP may vary in airlines and airports.

To reduce risk, school excursion cohorts should continue to implement appropriate standard control measures to mitigate COVID-19 transmission where possible in the different parts of their journey.

These include physical distancing of a school excursion cohort, during boarding, disembarking, and the flight, during which a school excursion cohort can be seated together with spacing between other groups and individuals to mitigate the risk of COVID-19 transmission.

The requirement to wear a mask is established by public health orders in each State/Territory.

Generally, the wearing of face masks is required in all Australian airport terminals and on all domestic commercial flights.

However, prior to undertaking air travel, you should review the relevant State/Territory guidance for the State/Territory you will be travelling to and from, as these requirements may vary.

If coaches are required for local or interstate travel, including to and from venues, adults within a cohort should adhere to physical distancing requirements of 1.5 metres from other adults.

If physical distancing cannot be always guaranteed wearing a face mask should be adhered to, as recommended by The Centres for Disease Control and Prevention (CDC) guidelines² – and in accordance with public health directions in each State/Territory.

At all times children and adults within a cohort should maintain a high level of cough etiquette and personal hygiene practices.

Environmental Cleaning recommendations

The Department of Health has published [Coronavirus \(COVID-19\) Information about routine environmental cleaning and disinfection in the community](#).

¹ Australian Government <https://www.infrastructure.gov.au/aviation/domestic-passenger-journey-protocol.aspx>

² CDC <https://www.cdc.gov/coronavirus/2019-ncov/index.html>

School Children as a Cohort

1. School children treated as a cohort within the school environment and at venues attended for educational purposes reduces the risk of COVID-19 transmission.
2. A cohort is defined as a group of people with shared characteristics (e.g. a school class, a year level) that has been established as a cohort within a school environment.
 - 2.1. Schools should remain in cohort bubbles, maintaining physical distancing from student cohorts from other schools during travel and excursion activities.
 - 2.2. This mitigates the risk of COVID-19 transmission into the broader community will aid containment and contact tracing in the event of a confirmed case of COVID-19 within a cohort.
3. Transmission of COVID-19 between children and from children to adults is uncommon, however adults who have not been specifically requested to fulfil a necessary function/role during a school excursion – e.g. part of a mandatory adult: student ratio, or an essential carer to a student – should be excluded from the excursion.
4. AHPPC does not endorse the need for a group of school children to maintain 1.5 metre physical distancing during times of cohort activities.
5. Movement of a cohort during an excursion could, for instance, take the form of:
 - 5.1. A year level (~100 children) plus adults who already share a common space within the school environment.
 - 5.2. They are transported as 1 cohort by coaches to a community venue where they are not required to maintain 1.5 metre physical distancing within their established school cohort but are required to practise physical distancing from other cohort groups (e.g. another school group from a different school) and members of the public.
 - 5.3. During this time, a high level of personal hygiene, including hand hygiene and cough etiquette, should be maintained.
 - 5.4. Precautionary measures such as designated toilets and eating areas should be considered to ensure this cohort does not mix with other similar cohort groups at a venue.
 - 5.5. The return journey should consist of the original cohort of children and adults on board the same coaches with the same Drivers used to transport the group to the venue.

Hygiene Practice

1. School children do not need to follow strict adult physical distancing guidelines, but should follow good hygiene practices including:
 - 1.1. Regularly washing hands and using of hand sanitiser.
 - 1.2. Not sharing drinks or food.
 - 1.3. Coughing or sneezing into the crook of an elbow, or a tissue which is immediately discarded.
 - 1.4. Monitoring for symptoms of COVID-19, or other respiratory illness, and to isolate from other members of the excursion cohort and seek appropriate testing.

Vaccination

1. Unvaccinated children are susceptible to the COVID-19 virus.
2. The best method to protect all children who are unable to be vaccinated from COVID-19 is to ensure those around them are vaccinated.
3. High vaccination rates of adults around school-age children who are unable to be vaccinated will reduce the risk of COVID-19 transmission and infection, in a process called cocooning.
4. All frontline vaccine-eligible adults – such as Teachers, Drivers, attraction staff and accommodation staff – should be fully vaccinated before coming into contact with a school excursion cohort, in line with the AHPPC's advice related to reducing the opportunities for the virus to enter school populations.³
5. Attraction staff who usually interact with students will be aware [the ACT is the most highly vaccinated jurisdiction in Australia](#).
6. It is recommended that all children aged 5 years old and above are fully vaccinated against COVID-19 prior to attending a school excursion (unless a medical exemption prevents them from being vaccinated) to reduce their risk.
7. Unwell students, Teachers, Drivers, attraction staff and accommodation staff should not attend excursion-related sites, regardless of their vaccination status, and should seek medical advice as to whether COVID-19 testing is required.

Masks

1. Mask wearing should be consistent with ACT Government mandates and recommendations related to the school environment.⁴
2. In the ACT masks are required to be worn on public transport, including a public bus (including a coach chartered for school excursions carrying children in years 7 to 12), light rail vehicle, taxi, rideshare vehicle, hire car or demand response service vehicle.
 - 2.1. Drivers of these vehicles must also wear a mask when transporting passengers.
3. It is recommended that Teachers, accompanying adults and attraction employees should protect themselves and others by wearing well-fitted masks while at attractions.
4. Wearing a mask is not dependent on whether an individual is vaccinated or mandated by public health orders.
 - 4.1. Masks protect you and the broader community, including those who are unable to get vaccinated, such as young children.
5. All frontline staff at an attraction and/or accommodation venue coming into contact with school students during excursions are encouraged to wear a mask for additional protection against the transmission of COVID-19.
6. While mask wearing requirements have eased, the Canberra community is strongly encouraged to continue to wear a mask when entering public indoor settings where it could be difficult to maintain physical distancing.⁵

⁴ ACT Government <https://www.education.act.gov.au/public-school-life/covid-school-arrangements>

⁵ ACT Government <https://www.covid19.act.gov.au/stay-safe-and-healthy/face-masks>

Pre-excursion Risk Assessment

1. If a child displays symptoms of COVID-19, or is generally unwell, they should not attend school.
 - 1.1. They should undergo testing for COVID-19 and isolate until a negative result is received, in accordance with guidance provided by the relevant jurisdiction.
2. If necessary, the child's Parent/Guardian/Carer should seek medical advice immediately.
3. All children and young people with a health care plan should ensure this is up-to-date and that, if required, it provides additional advice on monitoring and identification of the unwell child in the context of the COVID-19 pandemic.
4. Prior to attending an excursion all attendees should undertake COVID-19 testing, if required by a relevant school policy.
5. In the 24-hour period before prior to a child joining an excursion a Personal Health Declaration (PHD) must be completed by a child's Parent/Guardian/Carer, which includes a declaration of the current health status of the child.
6. The PHD requires the Parent/Guardian/Carer of a child to declare if they have visited an exposure site during a designated exposure period (if their State/Territory declares exposure sites).
7. If any Teacher, Parent/Guardian/Carer, or child due to attend the excursion has visited an exposure site during a designated exposure period their school must assess whether they should attend the excursion.
8. Part of the PHD includes granting permission in circumstances of Public Health Unit (PHU) engagement, for a child to undergo testing for COVID-19 in accordance with PHU directives and State/Territory management guidelines.
9. All PHDs and the information they contain are to be collected and managed by the child's school in accordance with privacy requirements.
10. Before commencing the excursion (e.g. boarding a coach), observation of a child's general wellbeing is recommended to be undertaken by Teachers supervising the cohort.
11. If a child displays symptoms of COVID-19 they should not take part in the excursion.
12. If any Teacher, Parent/Guardian/Carer or child due to attend the excursion is a suspected COVID-19 case they should be excluded from the cohort and isolated if they test positive for COVID-19.
 - 12.1. The Parent/Guardian/Carer of a child must be contacted immediately.
 - 12.2. The excursion should not go ahead.
13. Schools should not conduct COVID-19 testing themselves.

Transport

Transport and tour operators must have a COVID-19 safe plan specific to their operation.

Coach Travel

1. Maintaining adult–adult and adult–child physical distancing is recommended for all adults accompanying a cohort of children within a school environment, during transportation, and during an excursion.
2. Adults accompanying children should maintain 1.5 metre physical distancing from other adults – an example of physical distancing may include:
 - 2 adults sit on 2 sides at the front of the coach.
 - 2 adults sit on 2 sides at the back of the coach.
3. If adults are unable to physically distance during transportation or during an excursion the wearing of a face mask should be adhered to, as recommended by CDC guidelines.⁶
4. Physical barriers such as plexiglass should be installed around a Driver's seating area to isolate them from coach passengers, reducing the transmission risk of COVID-19 during boarding, disembarking and transport.
5. If physical barriers such as plexiglass are not available, spaced seating and a restricted area around the Driver should be maintained, with the 1st row of the coach remaining empty when possible.
6. Drivers should wear face masks, as recommended by CDC guidelines – and in accordance with public health directions in each State/Territory – when physical distancing cannot be guaranteed.
 - 6.1. In the ACT Drivers must wear a face mask when transporting passengers.
7. Entering and exiting a coach should be completed by separate doors, if possible, to allow for unidirectional flow of movement through the coach.⁷
8. If separate entry and exit doors are not available, movement of students boarding and disembarking a coach should be orderly and controlled by supervising adults.
9. An example of this is disembarking 1 row of seating at a time to eliminate bottlenecking of students at a coach door.
10. During the boarding and disembarking process the Driver should remain behind the physical barrier of plexiglass or consider remaining outside the coach.
11. All coaches should carry a full PPE kit on board to help address unforeseen situations that may require the use of PPE.
12. PPE kits should include gloves, surgical masks, safety eyewear (goggles/face shields) and gowns.
13. Kits should also include bags for waste disposal and hand sanitiser to maintain hand hygiene.

⁶ CDC <https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/cloth-face-cover-guidance.html>

⁷ Australian Government <https://www.health.gov.au/news/principles-for-covid-19-public-transport-operations>

Air Travel

Generally, the wearing of masks is required in all Australian airport terminals and on all domestic commercial flights.⁸

Pre-departure

1. When dropping off a child at an airport on the day an excursion begins a Parent/Guardian/Carer must complete a PHD screening tool for their child; this includes a declaration of the current health of the child.
2. It is highly recommended that school groups use a separate group check-in area where possible, as this practice supports physical distancing from the public.
3. It is recommended that, at the initial gathering / attendance recording of a cohort within an airport facility (during handover of a child from a Parent/Guardian/Carer to a Teacher in charge of an excursion), before each child joins the cohort, observation of the general wellbeing of the child should be undertaken by educators / adult supervisors, prior to the Parent/Guardian/Carer leaving the facility.

Departure Terminal

1. Where possible physical distancing of the cohort from members of the public should be maintained while traversing through airport terminals.
2. If possible, the cohort should remain in 1 area once they arrive at the boarding gate.
3. Interaction between the cohort and members of public should be limited when possible.
4. Regular hand hygiene should be undertaken.
5. Supervising adults should carry hand sanitiser – regular use is encouraged for the cohort while waiting to board.
6. In the event of the use of toilet facilities at the airport, strict hand hygiene should be employed, with hand sanitiser applied to children on their return to the cohort.
7. Visitation to airport shops should be discouraged while waiting to board.
8. The purchase of food/drink items should be discouraged while waiting to board.
9. Strict hand hygiene measures should be applied if items from airport shops or food/drinks have been purchased at an airport.

⁸ Australian Government <https://www.infrastructure.gov.au/infrastructure-transport-vehicles/aviation/covid19-response/journey-protocol>

On-board/in flight

1. Physical distancing of the cohort from members of the public should be encouraged during the boarding process where possible.
2. The cohort should board the plane as 1 unit.
3. The entire cohort should be seated together in 1 area, if feasible separated from other groups or members of the public by at least 1 row of seats.
4. Adults travelling with the cohort should maintain physical distancing from other adults where possible.
5. Regular hand sanitisation pre-boarding and in-flight is highly recommended.
6. Educators and other supervising adults who are part of the cohort should carry hand sanitiser and promote regular use to members of the cohort.
7. Cough etiquette and hygiene measures should be encouraged at all times.

Disembarking

1. The cohort disembarking from the aircraft should be completed as 1 unit, maintaining physical distancing from aircraft crew and other members of the public where possible.
2. When possible, the cohort should remain seated until the aisle of the aircraft is clear of other passengers, to reduce the chances of bottlenecking while disembarking.
3. After disembarking the cohort should use hand sanitiser before traversing through the terminal to their baggage claim area.
4. The cohort should remain together as 1 unit in the baggage claim area, maintaining physical distancing from members of the public while waiting to claim their baggage.
5. Once baggage has been claimed the cohort should traverse as 1 unit to waiting transport, maintaining physical distancing from members of the public.
6. Before boarding a coach educators and supervising adults should conduct a wellness check of all cohort members.
7. Hand hygiene should be performed before boarding the coach.

Shared Accommodation

Accommodation providers must have a COVID-19 safety plan specific to their operation.

Shared Accommodation – Health & wellbeing

1. Ensure staff and customers who are unwell are excluded from the premises.
2. Ensure staff complete a health screen before each shift.
3. Ensure customers/guests complete a daily health screen.
4. Provide staff with information and training on COVID-19, including advice related to when to get tested, physical distancing and cleaning.
5. Encourage each adult within a cohort not to share a room with anyone else.
6. Where possible, for each cohort, use separate doors for:
 - 6.1. entry and exit
 - 6.2. check-in
 - 6.3. baggage storing points.
7. Reduce crowding wherever possible.
8. Promote physical distancing with markers on the floor in areas where people are asked to queue (e.g. reception and hand hygiene stations).
9. Where reasonably practical ensure all venue staff always maintain 1.5 metres physical distancing (including at meal breaks) and assign workers to specific workstations.
10. Review regular deliveries and request contactless delivery and invoicing where practical.
11. Manage group activities in common areas (e.g. movie rooms, games rooms) to ensure appropriate physical distancing.

Shared accommodation – Physical distancing

1. Ensure cohorts are physically distanced from each other at all times.
2. Encourage Teachers and Drivers to physically distance from each other and from students – students within a cohort do not need to physically distance from each other.

Shared Accommodation – Hygiene & Environmental Cleaning

1. Adopt good hand hygiene and cough etiquette practices.
2. Ensure hand hygiene facilities are available to customers and staff.
3. Ensure bathrooms are well stocked with hand soap and paper towels and contain posters with instructions on how to wash hands.
4. Make hand sanitiser available at key points and encourage frequent use.
5. Consider strategies to reduce the number of surfaces touched by customers.
6. Clean public areas frequented by staff or customers at least daily with detergent/disinfectant.
7. Clean frequently touched areas and surfaces several times per day with a detergent/disinfectant solution or wipe.
8. Maintain disinfectant solutions at an appropriate strength.
9. Use disinfectant solutions in accordance with manufacturer instructions.
10. Ensure staff wear gloves and face mask when cleaning.
11. Ensure staff wash hands thoroughly with soap and water before and after cleaning.
12. Engage a professional cleaning service with expertise in Environmental Cleaning & Disinfection to decontaminate all relevant areas if a potential COVID-19 case is identified.

Food Services & Dining Rooms

Food Services & Dining Rooms – Health & Wellbeing

1. Exclude from the premises staff and customers who are unwell.
2. Ensure staff complete a health screen before each shift.
3. Ensure customers/guests complete a daily health screen.
4. Provide staff with information and training on COVID-19, including advice related to when to get tested, physical distancing and cleaning.
5. Make staff aware of their leave entitlements if they are sick or are required to self-isolate.
6. Assign 1 staff member as a COVID-19 Safe Hygiene Marshall, who will utilise distinctive clothing (e.g. a hi-vis shirt or badge) and be responsible for ensuring all aspects of the COVID-19 Safety Plan are being adhered to, including overseeing physical distancing and cleaning, and ensuring the accuracy of recordkeeping.

Food Services & Dining Rooms – Physical Distancing

1. Each cohort is to be physically distanced from others within a dining room for the duration of a visit.
2. Students within a cohort do not need to physically distance from each other; however, Teachers and Drivers must physically distance from each other and from students.
3. A cohort is considered to be the school travel group, including Drivers, Teachers and students.
4. Ensure no contact or mingling between cohort groups and groups at other tables.
5. Move or remove tables and seating to support 1.5 metres of physical distance between cohorts.
6. Reduce crowding and promote physical distancing with markers on the floor where people are asked to queue, (e.g. at entrances to dining rooms and at food service and beverage stations).
7. Where possible, ensure venue staff maintain 1.5 metre physical distancing (including at meal breaks and in office or meeting rooms).
8. Assign workers to specific workstations.
9. If a premises has multiple food and drink areas staff should work in an assigned area and not work across different areas.
10. Stagger start times and breaks for staff members, where practical.
11. Consider physical barriers such as plexiglass around counters with high-volume interactions with customers.
12. Review regular deliveries and request contactless delivery/invoicing where practical.

Food Services & Dining Rooms – Hygiene & Environmental Cleaning

1. Adopt good hand hygiene practices and cough etiquette.
2. Where possible, restrict the use of public access to bathrooms in dining room.
3. Visitors should all use bathrooms in their allocated accommodation.
4. Reduce the number of surfaces touched by customers, wherever possible.
5. Do not supply serve buffet style food service areas, communal snacks, communal condiments, or self-service options (e.g. beverages or toast).
6. If condiments are offered, they should be single-serve items.
7. Design food service areas to be protected from cross-contamination, including through implementing measures such as sneeze guards.
8. All meals prepared for offsite activities (e.g. packed lunches) are to be provided in single-use packaging for each person (there should be no shared meals or cutlery).
9. Ensure cutlery and tableware is cleaned with detergent and hot water, or with a commercial grade dishwasher.
10. Maintain disinfectant solutions at an appropriate strength.
11. Use disinfectant solutions in accordance with the manufacturer's instructions.
12. Ensure staff wash hands thoroughly with soap and water before and after cleaning.
13. Clean frequently used indoor hard surface areas at least daily with detergent/disinfectant.
14. Clean frequently touched areas and surfaces several times per day.
15. Clean tables, chairs, and any table settings between each cohort group.

Attractions

COVID-19 Safety Plans

1. An attraction's COVID-19 Safety Plan should outline how it will:
 - 1.1. manage public entry and exit points
 - 1.2. ensure movement of visitors in a single direction
 - 1.3. ensure physical distancing requirements are met
 - 1.4. develop and deploy appropriate signage
 - 1.5. maintain hygiene and infection control measures, including the management and cleaning of high-touch surfaces.

Physical Distancing & Hygiene Requirements

1. Monitor hand hygiene and cough etiquette
2. Monitor physical distancing of children transported as a cohort by coach from other cohort groups (e.g. another school group) and members of the public.
3. Monitor physical distancing of 1.5 metres between adults and children during excursions.
4. Monitor wearing of masks If physical distancing measures cannot be guaranteed at all times, as recommended by the CDC and Health Direct Australia.⁹

Scheduling of Excursions

1. Where possible stagger session times.
2. Arrival and dropoff times for different cohorts should be considered, to limit mixing between different cohort groups, including educators and other adults accompanying school excursions.
3. Carefully control the entry, exit and flow of patrons or visitors to avoid people congregating in large groups outside their cohort – patrons should leave a venue expeditiously and not mingle.
4. Obtain the details of a primary contact person (an educator travelling with the cohort) from each cohort group for contact tracing purposes.
5. Consider giving an introductory talk to each school group cohort before they enter a venue, to avoid potential mixing with other groups and the public in communal areas.
6. Maintain unidirectional flow through a venue to minimise the risk of a cohort encountering another.
7. Increase the frequency of cleaning in high-touch areas and restroom facilities.
8. Allow additional time between cohort groups for environmental cleaning of an area, recommended by the Australian Government Department of Health.¹⁰

⁹ Healthdirect Australia <https://www.healthdirect.gov.au/coronavirus-covid-19-how-to-avoid-infection-faqs>

¹⁰ Australian Government <https://www.health.gov.au/sites/default/files/documents/2020/03/environmental-cleaning-and-disinfection-principles-for-covid-19.pdf>

Management of Suspected & Confirmed Cases on Excursions

1. Schools should develop their own management plan for school visits to Canberra, including management of a sick child or a child or staff member who develops COVID-19 symptoms, or has a positive COVID-19 test.
2. If a Teacher, Parent/Guardian/Carer or child becomes a suspected COVID-19 case during a school excursion or is experiencing symptoms consistent with COVID-19, they should be isolated from the cohort in an appropriate space until symptoms resolve.
3. ACT Government advice regarding Interstate school excursions should be referred to.
4. Standard precautions should be adopted when providing care / first aid to a person suspected of having COVID-19.
 - Gloves, masks and, if available, a protective gown or apron should be used, including when dealing with blood or body fluids/substances.
 - Personal Protection Equipment (PPE) used should be double bagged and disposed of.
 - Wash hands with soap and water or use a hand sanitiser before and after providing care / first aid.
5. Teachers will remain with their cohort and maintain duty of care in contact with Parents/Guardians/Carers.
 - 5.1. If a person quarantined separately is a child they must be supervised by a Teacher.
6. A Parent/Guardian/Carer will be able to come to Canberra and isolate with their child.
7. Teachers may contact the [COVID-19 Helpline](#) for advice.
8. People exposed to COVID-19 are advised to following the guidance published at [Information for people exposed to COVID-19](#).
9. Where tests are negative a cohort can resume its excursion itinerary.
10. Schools returning home must contact their State/Territory health department before travel and heed advice provided to them.
11. If a cohort has travelled by coach, it may return home by coach (if the destination can be reached without stopping), and then isolate for at least 7 days.
12. A child with symptoms should remain separate to avoid passing on illnesses and should be collected by a Parent/Guardian/Carer as soon as possible.
13. Drivers will be encouraged to wear PPE and must isolate on return, dependent on the quarantine requirements within the relevant jurisdiction.
14. Importantly, Teachers should:
 - Create a list of potential [close contacts](#).
 - [Notify the NCETP](#) so all attractions visited by a school can be notified.
